Your Learning Path

Every strong AI career starts with a solid base. At Techtonic, your learning path moves from deep fundamentals to applied projects, so you always know why something works—not just how to copy it.

Step 01

Core Understanding

Foundations of LLMs, prompting, and embeddings.

Step 02

Tools & Stack

Python, APIs, LangChain, vector DBs, and integration basics.

Step 03

Guided Projects

Build your first Q&A bots, summarizers, and assistants.

Step 04

Edit with

Lovable

Step 05**Portfolio & Next Steps**

Polish projects, publish code, and position your skills for roles.

Hands-on Projects

Build Real, Portfolio-Ready Projects

Not toy demos—build projects that showcase real skills to employers and clients alike.

Beginner Projects

Advanced Projects

Beginner

AI Study Assistant

Build a chatbot that answers questions from your own PDFs and notes.

→ Learn basic RAG concepts and document ingestion.

Beginner

Email & Document Summarizer

Create a simple app to summarize long emails, reports, or articles.

→ Focus on prompting, API usage, and clean UX.

Techtonic Learning Solutions

Task & Idea Brainstorm Bot

Build a personal assistant that helps you brainstorm ideas and to-do lists.

- Practice conversational AI design and prompt engineering.

Domain-Specific Q&A Bot

A chatbot tailored to a specific domain using advanced RAG techniques.

- Focus on retrieval quality, context windows, and evaluation.

↗ Advanced

Multi-Tool AI Assistant

An assistant that can call tools like web search, calculator, or internal APIs.

- Understand tool-calling, planning, and basic agent behavior.

↗ Advanced

Insight Generator from Data

Upload CSV or connect to SQL and generate insights using LLMs.

- Connect GenAI to real data workflows.

For Companies & Teams

We also work with companies to upskill their teams in practical Generative AI. From foundations to applied systems, we design programs that fit your stack and business context.

- ⌚ Custom bootcamps tailored to your industry and tech stack.

- 👤 Hands-on sessions with real use-cases from your environment.

- 📅 Team projects guided by senior instructors.
